## Arena Banner Sponsorships (continued)

*“For the past 30 years, my daughter has experienced the thrill of getting out of her wheelchair, walking up the ramp, and getting assistance to mount a magnificent gentle horse and ride ‘like the wind’ (she says). Riding isn’t just a therapeutic exercise for her. Yes, it does help her posture, her hips and legs, her stamina, her coordination, her mental alertness, her listening skills, and her social skills . . . But, the smile on her face never, never goes away when she’s riding . . . There really is no way to explain how much Little Bit means to her life, because it means everything.”*
